

5636179

**B.Tech. DEGREE EXAMINATION,
NOVEMBER/DECEMBER 2016.**

Sixth Semester

Computer Science and Engineering

WEB TECHNOLOGY

(2013-2014 onwards)

Time : Three hours

Maximum : 75 marks

PART A — (10 × 2 = 20 marks)

Answer ALL questions.

1. What is SMTP? Mention any one use of it.
2. Define literal in Java script. Give an example.
3. What is cookie? How to create it?
4. Mention any two uses of session tracking.
5. Give the basic structure of XML schema.
6. Mention any two differences between XLink and XPath.
7. Define E-Marketing. Mention any one use of it.

8. What is search interface?
9. Define SOAP. Mention any one security issue of it.
10. What is web service? Mention any one supporting language of it.

PART B — (5 × 11 = 55 marks)

Answer ALL questions, ONE from each Unit.

All questions carry equal marks.

UNIT I

11. Explain the following :
 - (a) SMTP
 - (b) MIME.

Or

12. Discuss the various data types available in Java Script.

UNIT II

13. Explain the life cycle of servlet with a neat diagram.
- Or
14. Write about the steps involved in creating simple Beans in detail.

2

5636179

UNIT III

15. Discuss about the basics and revolutions of XML.
- Or
16. Explain the steps involved in how to integrate XML with database in detail.

UNIT IV

17. Write short notes on :
 - (a) Speech synthesis.
 - (b) E-Business model.

Or

18. Discuss about design and working principles of search engine.

UNIT V

19. Explain the architecture of web service and how to deploy it.
- Or
20. Write and explain the ways to improve web page performance using Ajax.

3

5636179

UNIT V

- (a) Explain the steps to develop and deploy web services with an example.

Or

- (b) What is Ajax? List the best practices that you can adopt in Ajax driven web applications and explain any two of them.

5636179

B.Tech. DEGREE EXAMINATION, MAY 2018.

Sixth Semester

Computer Science and Engineering

WEB TECHNOLOGY

(2013-14 onwards)

Time : Three hours

Maximum : 75 marks

PART A — (10 × 2 = 20 marks)

Answer ALL questions.

1. What is the difference between IMAP and POP3?
2. Give four methods of Array object in JavaScript.
3. What is server side scripting?
4. List out any two major features of java beans.
5. How to represent the XML Document?
6. Mention any 3 XML Parsers.
7. Write the advantages of using multimedia in web design.

8. What is E-marketing?
9. Give the components of web service.
10. What is WSDL?

PART B — (5 × 11 = 55 marks)

Answer ALL questions.

UNIT I

11. (a) Explain :
 - (i) Any two mail protocols
 - (ii) Three ways of using CSS in HTML document. What is selector? Mention its types.

Or

- (b) Mention and describe JavaScript development tools. Explain defining function, calling a function and function parameters in JavaScript with examples.

UNIT II

12. (a) Explain the basic servlet architecture with diagram. Define Cookies. Write the steps to show how cookies works.

Or

2

5636179

- (b) How the sessions can be maintained in Session tracking? What is Actions in JSP? What are two attributes that are common to all Action elements? Explain any two JSP Actions with their purpose.

UNIT III

13. (a) Give the purpose of the XML DTD. How does to use XPath in JavaScript? Describe the main role of XPath in selecting the XML document.

Or

- (b) What is XSL Programming? Explain how to parse XML using DOM, SAX.

UNIT IV

14. (a) Explain any two E-Business model. Describe the fundamental requirements for having secured online transaction.

Or

- (b) Explain the workings of search engine and the steps in design of search interface.

3

5636179

5636179

B.Tech. DEGREE EXAMINATION, NOVEMBER 2017.

Sixth Semester

Computer Science and Engineering

WEB TECHNOLOGY

(2013–2014 onwards)

Time : Three hours

Maximum : 75 marks

PART A — (10 × 2 = 20 marks)

Answer ALL questions.

1. Define "Markup Language".
2. Write short notes on MIME.
3. List out any four major features of JSP.
4. Write short notes on Servlets.
5. With an example, explain the usage of DTD.
6. Write short notes on XPointer.
7. Write in short about Streaming in web applications.

8. Explain the advantages of E-Marketing.
9. Write in short about WSDL.
10. Illustrate the benefits of Single Page Web applications.

PART B — (5 × 11 = 55 marks)

Answer ALL questions.

UNIT I

11. Define CSS. What are the various types of CSS? Explain the application of CSS with a case study of Online tutoring web site.

Or

12. Elaborate in detail about Object handling features supported by JavaScript.

UNIT II

13. Illustrate in detail about life cycle of a Servlet with an example of your choice.

Or

14. With a case study of a movie ticket booking web site explain steps involved in database handling in JSP.

2

5636179

- #### UNIT III
15. Elaborate in detail about Namespaces in XML with an example.

Or

16. Explain in detail about XSLT and its applications with a case study of a Online Technology Magazine.

UNIT IV

17. Illustrate in detail about various components involved in e-commerce and it's business model.

Or

18. Write in detail about Semantic Search process. Explain various components involved in designing a Semantic Search Engine.

UNIT V

19. With a case study of "Unit Conversion" explain the steps involved in the design of a web service.

Or

20. Illustrate in detail about various mechanisms available to improve the page performance using AJAX.

3

5636179

5636179

B.Tech. DEGREE EXAMINATION, APRIL/MAY 2016.

Fifth Semester

Computer Science and Engineering

WEB TECHNOLOGY

Time : Three hours

Maximum : 75 marks

PART A — (10 × 2 = 20 marks)

Answer ALL questions.

All questions carry equal marks.

1. List out the different functions of Web Browser.
2. State the uses of IP.
3. How to create Arrays in Java Script?
4. Compare Client and Server side Programming.
5. Define XML namespace.
6. What is ActiveX Control?
7. List the different steps to be followed while adding Multimedia file to the web?
8. List out the basic security requirements for E-Business.

9. Deduce the pros and cons of Web Services.

10. What is UDDI?

PART B — (5 × 11 = 55 marks)

Answer ALL questions, ONE from each Unit.

All questions carry equal marks.

UNIT I

11. (a) Summarize the concept of DNS. (6)

(b) Write short notes on WWW. (5)

Or

12. Explain HTML forms in detail along with form elements, attributes and methods and Write an HTML document to provide a form that collect name and telephone numbers. (11)

UNIT II

13. Write a java Script that inputs several lines of text and a search character determines the number of occurrences of the character in the text using suitable string methods. (11)

Or

14. (a) Explain how are the JSP requests handled with an example. (6)

(b) What are Directives? Explain the concept of JSP directives. (5)

2

5636179

UNIT III

15. Create a XML document for students mark preparation. Write DTD for validating the XML file. (1)

Or

16. Write XML scheme for the following. (1)

Music	Category			quantity	company	
CD-ID	type	Name	cost		Name	singer

UNIT IV

17. Explain in detail about the N-tier Architecture and its components. (11)

Or

18. Illustrate the components of E-Business XML Systems. (11)

UNIT V

19. Summarize the different major elements of SOAP. (11)

Or

20. Describe the significance and working of WSDL with an example. (11)

3

5636179

5636179

B.Tech. DEGREE EXAMINATION, NOVEMBER 2018.

Sixth Semester

Computer Science and Engineering

WEB TECHNOLOGY

(2013-2014 onwards batches)

Time : Three hours

Maximum : 75 marks

PART A — (10 × 2 = 20 marks)

Answer ALL questions.

All questions carry equal marks.

1. What is MIME and list its application?
2. List any four attributes of cascading style sheets.
3. What are cookies and what is its application?
4. What is session tracking in JSP?
5. What is XML schema?
6. What is XPointer?

7. What is audio and video speech synthesis?
8. What are the optimization parameters for search engine?
9. What is UDDI and explain its significance.
10. How does Ajax help in improving web page performance?

PART B — (5 × 11 = 55 marks)

Answer ALL questions, ONE from each Unit.

All questions carry equal marks.

UNIT I

11. Discuss the significance and impact of POP3, IMAP and MIME as protocols in the Internet.
- Or
12. Discuss functions and objects in Javascript with appropriate examples.

UNIT II

13. Discuss session tracking and database connectivity in JSP.
- Or
14. Discuss the strengths and life cycle of a servlet.

2

5636179

UNIT III

15. Explain the importance of XFiles with clear description of XLink, XPointer, and XPath.
- Or
16. Explain XML documents in detail with appropriate example.

UNIT IV

17. Briefly explain web applications used in electronic commerce.
- Or
18. Discuss N-Tier Architecture in Multimedia and web Applications.

UNIT V

19. Discuss programming in Ajax with a web page design.
- Or
20. Discuss Web service Architecture in detail.

3

5636179

5636179

B.Tech DEGREE EXAMINATION, MAY 2019.

Sixth Semester

Computer Science Engineering

WEB TECHNOLOGY

(2013-14 onwards Regulations)

Time : Three hours

Maximum : 75 marks

PART A — (10 × 2 = 20 marks)

Answer ALL questions

All questions carry equal marks.

1. Write any two uses of Internet?
2. What is a Domain name server?
3. Write short notes on Servlets?
4. Explain session tracking with an example.
5. Lay it out the revolutions of XML?
6. What is meant by Namespaces
7. Specify Multimedia in web design.
8. Bring out notes on Electronic Commerce.

9. Designate WSDL.

10. How to improve the webpage performance using Ajax?

PART B — (5 × 11 = 55 marks)

Answer ALL questions, ONE from each Unit

All questions carry equal marks.

UNIT I

11. (a) Enlighten the various protocols usages? (6)
(b) What is Cascading style sheet? Elucidate. (5)

Or

12. Illuminate the following:
(a) Java script in perspectives. (6)
(b) Java script debuggers and regular expressions. (5)

UNIT II

13. Render the Architecture and Life Cycle of the Servlets. (11)

Or

14. (a) Describe the components of JSP. (6)
(b) Write short notes on EJB. (5)

2

5636179

UNIT III

15. (a) Explicate the XML basics and XML scheme. (6)
(b) Set right how to integrate XML with database. (5)

Or

16. (a) What is the parsing XML using DOM? (6)
(b) Justify Formatting XML on the web. (5)

UNIT IV

17. Construe the Multimedia and web applications. (11)

Or

18. Discuss E-Marketing and Online Payments and security. (11)

UNIT V

19. Enlighten the Web Service Architecture. (11)

Or

20. (a) Discuss how to develop and deploy web services (6)
(b) Write briefly about the programming in Ajax (5)

3

5636179
